

Jeremy Lu

(872) 985-5632 | jwlu920@gmail.com | <https://jwchlu.github.io/portfolio/>

EDUCATION

Northwestern University, Evanston, IL

Cumulative GPA: 3.63

BSc in **Mechanical Engineering and Segal Design Certificate**

Expected Graduation: June 2026

Relevant Coursework: Computer Integrated Manufacturing, Industrial Design Methods & Projects, Material Selection, Industry 4.0 Manufacturing

RELEVANT EXPERIENCE

Myra Vision, Campbell, CA

July 2025 - September 2025

Process Engineering Intern

- Developed and integrated an ASTM F88 compliant test methodology for validating implant packaging, including the design of custom fixtures and tooling to ensure high-accuracy seal strength peel testing.
- Authored technical SOPs and trained manufacturing personnel to embed new testing protocols into existing manufacturing standards, ensuring 100% regulatory compliance.
- Designed and prototyped low-contact fixtures for silicone implant curing and extraction processes to minimize material handling, reduce shrinkage and deformation by 5% during the manufacturing process.
- Conducted comparative data analysis on shrinkage and deformation rates, validating the feasibility of reduced-contact designs to improve process consistency and projected product yield.

LuxCreo, Chicago, IL

Product Development Intern

July 2024 - September 2024

- Created, tested and validated a 3D printed dental night-guard workflow that reduced the print and post-processing time of night guards by 50% while maintaining compliance and accuracy, optimizing print parameters for fast manufacturing and accuracy
- Designed and tested 10 iterations of a compact tool to assist the removal of dental models from thermoformed aligners during the production process, working with large scale dental labs and smaller clinics to integrate the tools into their workflow, reducing post processing time by 40% and allowing dental models to be reused
- Validated and optimized 3 third-party resins for the printing of night guards, try-in dentures and crowns for the iLuxPro Dental printer to achieve accuracy and print time requirements

Northwestern Baja SAE, Evanston, IL

Ergonomics Engineer

September 2022 - June 2024

- Designed and manufactured 2023-24 car's throttle system, performing FEA, water-jetting, and welding
- Designed and manufactured the 2022-23 car's Fiberglass seat, improving the maintenance and ease of use while reducing the cost of the seat by \$120 USD and the weight of the seat by 3 lbs
- Created a weather-resistant modular system for padding on the seat to allow drivers of over 2 ft of height difference to race rule-compliant at the Baja SAE Oshkosh, WI race, placing 8th in Endurance
- Serviced previous cars, repairing powertrain guarding, brake systems, and manufacturing various replacement powertrain and suspension components on the lathe

PR and Outreach Lead

June 2023 - June 2024

- Establish and maintain connections with private industry sponsors as well the university to support and fund the team's car, activities and competitions each year
- Manage and create content reaching 2600+ accounts for NU Baja's social media, growing the team's brand and improving recruiting by adding 40+ new members
- Coordinate annual project fundraising by writing, filming, and directing videos for fundraising promotion, successfully reaching fundraising target of \$13,000 USD
- Build and maintain team website to showcase team members, current progress and attract new sponsors

Feng Tay Group, Douliu, Taiwan

August 2023

Design Workshop Member

- Analyzed and toured the production and supply chain of multiple Nike shoe models for large scale production
- Attended workshop classes taught by industry professionals learning about the design and manufacturing process of various Nike footwear models, ranging from casual sneakers to Olympic weightlifting shoes
- Handcrafted a pair of Nike Air Force 1 shoes utilizing a variety of classic manufacturing methods

SKILLS

Design & Manufacturing: 3D Printing (SLA, DLP, FDM), CAD & CAM (Solidworks, NX, Fusion360), CNC

Computer: Python, C, MATLAB, Wordpress, Excel, Powerpoint
